

TEST REPORT 30/2009

Customer Details: : Latouros Quarries Ltd
: Anagenniseos 26 A
: 6050 Larnaca
: Tel. 24 03 00 20
: Fax. 24 03 00 19
Sample Type : Sand
Sampled By : Customer
Gemanalysis Sample Code : 0904SA05
Date sample was received : 23/04/2009
Date analysis was completed : 07/05/2009
Date of submission of test report : 07/05/2009

The sand sample was tested according with the international standard CYS EN 1744-1, as described bellow:

1. Determination of water soluble chloride salts using the Vohlard method (reference method) (paragraph 7)
2. Determination of total sulfur content (paragraph 11)
3. Determination of acid soluble sulfates (paragraph 12)

Customer sample code	Gemanalysis sample code	Water Soluble Chlorides C %	Acid soluble sulfates SO ₃ %	Total Sulfur S %
09/32	0904SA05	0.003	0.1733	Not detected

Mihaela Lysandrou

Technical Manager

This test report should not be reproduced other than in full without the written approval of Gemanalysis Laboratory. These results pertain only to the item(s) tested as sampled by the Customer unless stated otherwise. Unless stated otherwise, testing will have been conducted to the version of any specification quoted, current at the date of test.
