TEST REPORT

Customer :	Latouros Quarries
ATT:	Mr. Antonis Latouros
ADDRESS:	26A Anagenniseos Street, 6050 Larnaka
MOB:	99 63 07 02
TEL:	24 03 00 18/20/21
FAX:	24 03 00 19
EMAIL:	latouros@latouros.com
Sample Type :	Sand
Sampled By :	Customer
GEMANALYSIS Sample Code :	1003SA01
Date sample was received :	23/03/2010
Date analysis was completed :	16/04/2010
Date of submission of test report :	19/04/2010

TR3510

This test report may not be reproduced, except in full, without the written approval of GEMANALYSIS Laboratory. These results pertain only to the item(s) tested as sampled by the Customer unless stated otherwise. Unless stated otherwise, testing will have been conducted to the version of any specification quoted, current at the date of test.

The sand sample was tested according with the international standard CYS EN 1744-1, as described below:

1. Determination of water soluble chloride salts using the Vohlard method (reference method) (paragraph 7)
2. Determination of total sulfur content (paragraph 11)
3. Determination of acid soluble sulfates (paragraph 12)

Customer sample code	Gemanalysis sample code	Water Soluble Chlorides Cl %	Acid soluble sulfates SO ₃ %	Total Sulfur S %
10/23	1003SA01	0.01	0.01	0.08
